

Composition on Science In Everyday Life

Introduction:

Modern and civilized life is life on the lap of science. Science extends its assisting hand in almost every step of our life. Science accompanies us as an after going from dawn to dusk. So our Everyday life is now totally blessed with the charismatic presence of science.

Science in Running Life:

Science has dramatically changed the lifestyle of a modern man. The alarm of a clock or a mobile phone wakes them up at any hour he wants. His personal and domestic works are also eased and blessed with the strong presence of science. Scientific modern vehicles like buses, cars, trams, etc can carry him to his school, college, or office. The electric life takes him to the top floor of a multi-storied building in the twinkling of any eyes without any manual labor. The fastest means of travel has made the world a very small place to live in. Besides, the computer, the greatest gift of the science of the 20th century, helps us a lot. It has relieved man from manual and mental labor to a great extent.

Science in Saving Life:

Man can easily get the benefit of modern drugs or surgery which are the important gift of science. Medical science has now enabled man to fight more confidently against fatal diseases. To speak the truth, the recent method of treatment and ultra-modern scientific instruments are now challenging the death of humans.

Science in refreshing life:

Science has arranged many things to refresh our life. After a day's handwork in his working place or institution, he may feel bored. Then he can easily enjoy a film in a cinema hall. Besides, he can enjoy various types of entertainment programs round the clock.

Science in Communication:

Science has made the world a global village. Now it is very easy to communicate with anyone in any corner of the globe in the twinkling of an eye. Telephones, mobile phones, internet are the special gifts of science in this field.

Conclusion:

Modern life cannot be thought of without the presence of science. Science has shown and is still showing its charisma in every sphere of our life. We cannot pass a single moment in the modern world without the help of science.
