Describe the Pie-Chart of The Amount of Time That A Person Spends Each Day on Various Activities

Question: The following pie-chart shows the amount of time that Rafique spends each day on various activities. Describe the pie-chart in about 150 words. You should highlight and summarize the information given in the pie-chart.

Answer: From the chart, it is visible that Rafique spends most of his time sleeping and it is 30%. He spends the least time eating which is 3%. In the study, he spends 25% which is the second-highest and this implies that he loves to rest and relaxation rather than any other activity. He goes to school and spends 20% time there. In sports and watching TV which can be regarded as his past times, he spends equally 5% and 10% in total. He also says his prayers and spends 4% of his time saying prayers. In other activities, he spends 8%. Overall, Rafique passes a routine. A life where his investment of time in different activities is quite reasonable.
