

Describing the Chart of The Choice of Profession by Different Educated People

Question: Look at the chart below. It is about the choice of profession by differently educated people. Now describe the chart in your own words.

Answer: The chart shows the choice of profession by differently educated people. Educated people prefer govt. Job, farming, business, and intellectual work. A lion share of educated people like govt. Job the participant in govt. Job is 80%. It for our numbers the other professions. Then only 10% of educated people like to run a business. It is 70% less than govt. Job. Less educated people prefer intellectual work. The percentage digit is only single which is 6%. On the other hand, only 4% of educated people like farming. So, govt. the job gets the highest professional value whenever farming gets the lowest. However, the difference between the highest and the lowest preference is 76%.
