

Describing the Graph of Telephone and Mobile Users

Question: The graph below shows 'The number of Telephone and Mobile Users' from 2001 to 2014. Describe the graph in 150 words. You should highlight and summarize the information given in the graph: –

Telephone and Mobile Users

Answer: The graph shows the number of telephone and mobile users from the year 2001 to 2014. At a glance, the graph shows that there has been a significant increasing trend of phone users over time. It is seen that in 2001, only crore people used telephone and mobile phone. Two years later, that is, in 2003, the users increase to crores. We notice a further increase in 2005 when the users turned to crores. The increasing trend continues in later years. Thus in 2007, the users are crore, in 2009 the users are crore, in 2012 they are crore, in 2014 they are crore. The growth trend over the period is crore, crore, crore, crores, crore. It is found that the highest growth () occurs between 2005 and 2007 and the lowest growth () occurs between 2001 and 2003. Thus, the graph shows a clear idea about the increasing trend of telephone and mobile users from the year 2001 to 2014.
