

# Paragraph on A Railway Station

**Question:** Write a paragraph about 'A Railway Station'. Your paragraph should include the answers to the following questions.

What is the railway station? Or, what can be termed a railway station?

What do passengers do here?

What do you know of a railway platform?

Usually how many rooms are there in a railway station?

What are the common shops in a railway station?

What are the common and regular activities of a railway station?

How does the station look when a train arrives and when it leaves the station?

**Answer:** A railway station is an important place for the communication system. It is a place where passengers get on the train and get down from the train. Every railway station has at least one building. In a railway station, there is a room for the station master, there is a booking room, there are rooms for ticket counters and there are waiting rooms for the passengers. Every railway station has a platform. Big stations have more than one platform. A railway station is usually a busy place. Passengers are often seen in long lines to collect tickets. Some passengers take a rest in the waiting room. Some passengers loiter here and there. Different types of vendors hawk their goods in the station. Some sell betel-leaf and cigarettes, some sell nuts. One can also see some permanent shops in a railway station. It is a dear place for the beggars. They can sleep here at night. But the sight of the station has some changes with the arrival and departure of a train. As soon as a train comes to the station, passengers rush to get on it while many passengers get down. So, there is often a collision between the two groups of passengers-incoming and outgoing. However, as soon as the train leaves the

station, it becomes less noisy. Thus, a railway station is a place of noise and activity.

Or,

## Paragraph on Railway Station

### Question:

What is the railway station?

What do passengers do here?

How is the building of a railway station made?

What can one see a station from a distance?

How many rooms are there in a railway station?

How many signals are there in the station?

What are the functions of a pointsman?

How do the passengers get on the train?

How does the station look when a train arrives and when it leaves the station?

**Answer:** A railway station is part and parcel of the train communication of a country. It is a place where trains stop and start. There is a platform here. Passengers get down and get into a train from a railway station. The buildings of a station are generally made of red bricks. One can see from a distance the green, red, and blue signal and painted houses of a station. There are waiting rooms for male and female passengers. There is a ticket counter, a booking office for goods, restaurants, a bookstall, and the station master's room, etc. There are two or more railway tracks in every station. There are two signals-one inner and the other outer. Before the arrival of a train, the pointsman gets them down. The pointsman moves with his red and green flags. There are stands for rickshaws, auto-rickshaws, and other vehicles in a railway station. Before the arrival of a train, passengers stand in line to

buy their tickets. When a train arrives, the station becomes busy and noisy. When a train leaves the station, it again becomes calm and quiet.

Or,

## A Railway Station

**Question:** Write a Paragraph about 'A Railway Station' answering the following questions.

What is a railway station?

How is the railway station?

What are the arrangements for the passengers?

When do people become busy there?

How is the scene of a railway station at night?

**Answer:** A railway station is a place where trains halt and then start from. It has few buildings and sheds. There are a station master's room, an assistant station master's room, a booking office, and waiting rooms in the station. The passengers wait either in the waiting rooms or on the platform for their respective trains. There is a least one platform in a station. When a passenger train arrives in, all people become busy to get on the train and get down from the train. The hawkers sell goods by hawking. The train halts for a few minutes and then departs. Then the station becomes calm and quiet till another train comes. At night the red and blue lights of the station look very beautiful.
