

Paragraph on Cleaning Your Teeth

Question: Write instructions for your younger brother/sister on the following everyday operation:

Cleaning Your Teeth

Answer: Cleaning teeth is not very difficult. First of all, get your brush wet with some water. Then take some paste on your brush. Now, start to brush the front part of your teeth. Next, brush the back part of your teeth very gently. Don't brush your teeth with great force. If you do so, your teeth will be harmed. Keep brushing your teeth at least for three minutes. After this, wash your teeth and brush with water. And thus, you can clean your teeth.
