

Paragraph on How to Cook Rice

Rice is our staple food. We cannot live without eating rice. But everybody does not know how to cook rice. Cooking rice is very easy and at the same time, it is very interesting. If you want to cook rice, you need to go through a number of steps. First, take some rice into a container and wash it properly until it gets dust free. Then take some more water into the container. It should be more than rice. Now place the container over a burning stove and let it boil for 20-25 minutes. You can put a lid over the container. It will quicken the cooking. You also need to examine some rice from time to time in order to be sure whether it is boiled properly or not. When you find that it has boiled properly, remove it from the stove and strain off the rice water from it. Rice is now ready. Take it in a bowl and serve it.
