

Paragraph on How to Prepares for The Examination

Question: Suppose your younger brother does not know how to prepare for the examination. Write a paragraph telling him how to prepare for the examination using the following keywords:

First, then, next, after that, finally

Answer: My younger brother is a student of class nine. He does not know how to prepare for the examination. I advised him to prepare in this way. First, I told him to attend the class regularly and listen to what the teachers say. Then, he would take notes from the lecture of teachers. Next, he must read the important chapters of the book, which may be set in the examination. After that, he must write down the answers to the important questions several times, so that no mistake occurs in his writing. Finally, he must revise his lesson frequently so that no part of his answer may be left out.
