## Paragraph on A Mobile Phone

**Question:** Write a paragraph about 'Mobile Phone'. Your paragraph should include the following questions.

What is a mobile phone?  
How does it work?  
Who are the users of it?  
What are the advantages of a mobile phone?  
What are the disadvantages of a mobile phone?  
What is your opinion about it?

**Answer:** A mobile phone is a wonderful invention of information technology. It is a cordless phone by which we can communicate and

talk to others in the shortest possible time. Before the mobile phone was invented, communication and the messaging system were very hard. But the mobile phone has now lessened the distance of the world. Everyone can bear it with him because of its small size. Thus, it has turned the world into a global village. It is a pragmatic and interesting matter that nowadays messaging and internet systems has been added to it. Using a mobile phone set one can take photographs, browse the internet, watch video films, manage world files, and so on. An ultra-modern mobile phone set is indeed a mini-computer. All these factors have made it popular among the users. Though it was a sign of aristocracy in the past, now it is found in everyone's hands in our country. Grameenphone, Citycell, Robi, Banglalink, Teletalk, Airtel, and some other mobile phone companies provide us with this service. However, with all the merits, a mobile phone has some demerits too. It is injurious to our health. It harms our brain when we talk through it. The excessive use of mobile phones often causes fatal diseases like brain tumors, cancer, etc. So, we should be conscious of using it. But yet, we can say that it has made our life peaceful and comfortable. Though it has some demerits, it is truly a blessing for modern life.

## Mobile Phone

**Question:** Write a paragraph about 'Mobile Phone' by answering the questions below.

What is a mobile phone?

What is its use?

Who are the users of mobile phones?

Why is the mobile phone used?

What is the advantage of using a mobile phone?

What is the disadvantage of using a mobile phone?

**Answer:** Mobile means moving. A mobile phone is a phone which can be carried easily from one place to another place. It is very small and easily portable in hands or pockets. It is used to communicate with others. Businessmen can run their business by communicating with others related to their business through mobile phones. Politicians, professionals, journalists, doctors, administrators, planners can communicate with the concerned people, exchange views and messages, ideas, through mobile phones sitting at a long distance with a minimum cost of money and time. It is used to send and receive messages, play games and sports, know the time and date, solve the work of mathematical calculation, get information about business and trade, and learn about news, we can easily communicate with our near and dear ones with a twinkle of an eye using a mobile phone. We can talk to our relatives with the help of a mobile phone and be free from tension and anxiety. But like other inventions of science, the mobile phone is not an unmixed blessing. With all the advantages, it has some disadvantages too. It is found that excessive use of mobile may cause cancer or affect our listening ability. It may also help criminals to commit crimes very secretly. Sometimes terrorists use mobile phones to conduct their acts of terrorism. But with all the disadvantages, a mobile phone is very useful and helpful to the people of the modern world. Nowadays, no man can think to do without a set of mobile phones in his hand or his pocket.
