

Paragraph on Watching TV: While I Am Free, I Watch TV

Question: Write a paragraph about 'Watching TV: While You are Free, You Watch TV' by answering the questions below.

Do you watch TV regularly?

How much time do you usually spend watching TV?

What types of programs do you enjoy?

Do you get any benefit from watching TV?

What is your idea about satellite telecasting?

Answer: Television, is a widely used media of mass communication, and is a source of knowledge, pleasure, and information. Television can educate the people as well as the students. It is the other name for the most effective and popular source of recreation for the people. I am a student and watching TV is my favorite pastime. I spend two or three hours a day watching it. My favorite TV programs are dramas, sports, and Animal Planet. Among these programs, Animal Planet is the program I enjoy most. Animals are the performers of this program. I have certainly benefited from these. I can say that TV is doing good for me by providing educational and recreational facilities. But commercial programs broadcast by foreign satellite TVs harm our youngsters by threatening our values, traditions, and religious beliefs. The TV programs lead the children more to recreation than to education. But nowadays, I think satellite telecasting is not morally desirable.
