

Short Paragraph on Deforestation

Question: Write a paragraph about 'Deforestation'. Your paragraph should include the answers to the following questions.

What is deforestation?

What are the causes of deforestation?

What are the effects of deforestation on animals and humans?

What are the effects of deforestation on rivers?

What measures should be taken to stop deforestation?

How can you influence people about it?

Answer: Deforestation means cutting down trees in large numbers. The causes of deforestation are many. People cut down trees to draw quickly. profit from them. To get more space for cultivation people are clearing forest land. Besides these. the lucrative price of wood allures people to cut down trees. Deforestation has a long-term bad effect on our lives. This disturbs our ecological balance. The existence of birds and animals is threatened. Due to deforestation carbon dioxide increases. As a result. global warming occurs. Today due to global warming the sea level is rising and many parts of the world are going to be engulfed. On the other hand. new areas of the world are turning into deserts as an immediate effect of deforestation. We may face the problem of flood, soil erosion drought, etc. We can take many measures to prevent deforestation. The tree plantation program should be expanded to the remote corners of the country. The government should introduce more T.V. and radio programs on the subject of afforestation. The common people should be informed of the danger of deforestation. Besides, the conscious people of society can influence the common people to plant more and more trees.

Or,

Deforestation

Question: Write a paragraph about 'Deforestation' by answering the questions below.

What do you mean by deforestation?

What are the effects of deforestation?

How can you save the country from it?

What is your suggestion about it?

How can you influence people about it?

Do you think every man and woman should plant a tree?

Answer: Deforestation means destroying our forest land by cutting down trees on a large scale. We need trees for oxygen. Trees provide shelter for birds and animals. They provide oxygen without which no animals can exist. To destroy trees means to destroy life on Earth. So, humans must not act foolishly and destroy forests. To maintain the ecological balance in a country, scientists say, we need 24% forest land compared to the total area. We, in Bangladesh, however, have only 15%. So, it is essential to increase our forest land by planting more and more trees. At the same time, we have to prevent people from cutting down trees. For this, what we need most is to organize a social movement and mobilize people to realize the importance of trees. In the present situation, I think every man and woman must plant at least one or two trees. The social movement, as I stated above, surely will go a long way to encourage people to afforestation and discourage deforestation.
