

Short Paragraph on Tree Plantation

Question: Write a paragraph on 'Tree Plantation' by answering the following questions.

What is a tree plantation?

What do trees do?

What role do trees play?

What do they supply us with?

What are the scopes of tree plantations?

Why should we devote ourselves to tree plantations?

How do trees keep our environment fresh?

Answer: Tree plantation means planting trees in a well-planned way. Usually, it is part of a programme to fight back against environmental pollution globally. The environment is being polluted every moment and the planet 'earth' is already under the threat of the Greenhouse Effect. Tree plantation is the most effective and easiest way to control the greenhouse effect. Trees play an important role in maintaining ecological balance. They produce oxygen; regulate rainfall and the ratio of oxygen and carbon dioxide in the air. They also supply us with food, drink, medicine, clothing, shelter, and so on. Trees supply raw materials for both small and big industries. The climate of Bangladesh is suitable for tree plantations. We can plant trees on both sides of roads and in the: Ten spaces of schools, offices, mosques, and temples. Trees help us in various ways; we must devote ourselves to tree plantation.

Or,

Tree Plantation

Question: Write a paragraph about 'Tree Plantation' by answering the

questions below.

What happens when we cut down trees?

What are the benefits of trees?

What do trees do to the land?

Which areas of ours should be brought under afforestation?

Whom should we motivate to plant trees?

Answer: Forests influence the climatic condition of a country or a particular region. Trees are called the oxygen factory. Oxygen is essential for our living on earth. But we are cutting down trees indiscriminately. For this reason, heat in the atmosphere is increasing. Thus, the temperature in the atmosphere is getting warmer. So, we should plant trees on a large scale. Trees give us food and shelter. Forests and trees are deeply interlinked with the overall development and progress of a country. They make the land fertile and save the land from erosion. There is ample scope for afforestation and plantation in our country. Sea beaches and low-lying areas can be brought under the scheme of afforestation. The sides of roads and highways should plant shady trees and fruit trees. Rural and illiterate people should be motivated to plant more trees.
